

iRadar[™] & Cobra[™]

For Android[™]

Quick Start Guide

NOTE: This device complies with part 15 of FCC rules: Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received including interference that may cause undesired operation.

CAUTION: Modifications or parts not approved by Cobra Electronics Corporation may violate FCC Rules and void authority to operate this equipment.

Thank you for purchasing Cobra iRadar[™] for Android[™], the world's first connected radar/laser/red light camera detector.

Cobra iRadar uses **Bluetooth[®]** wireless technology to connect your Android[™]-based smart-phone to display radar alerts and change settings.

Follow these simple steps to get your Cobra iRadar up and running.

Cobra iRadar is made for Android[™] based smartphones running Android[™] OS 2.1 or higher.

Setting Up Cobra iRadar

Plug in your Cobra iRadar detector unit using the included cigarette lighter adapter.

Turn unit on. A red LED will light.

The unit must be turned on in order to pair with your Android[™] Smartphone.

Pairing to iRadar

iRadar uses **Bluetooth[®]** wireless technology to communicate with your Android smart phone. In order to pair with iRadar, go to the **Bluetooth** Settings Menu on your phone. On most Android[™] phones, this is found by pressing; **Menu -> Settings -> Wireless & networks -> Bluetooth settings**.

Press "**Scan for Devices**" and select **iRADAR 105** from the list.

Pairing can take up to 30 seconds. If you are prompted to "**Accept password to pair**" press **Confirm**. When iRadar is properly paired, the message "Paired but not connected" will be displayed under **iRADAR 105** in the Bluetooth Settings menu.

For more information on pairing with **Bluetooth** devices, consult your phone's owner's manual.

Now that your are paired with iRadar, you must connect using the Cobra iRadar App.

Downloading the App

To download the App, enter the Android™ Market on your Android™ SmartPhone, search for “**Cobra iRadar**” and follow the onscreen instructions.

Once the app is launched, the phone will attempt to communicate with the iRadar detector unit. This connection may take up to 30 seconds. Once the connection is made the LED on the front of the detector unit will turn blue and an icon on the App’s home screen will say “**connected**”.

Now you’re ready to enjoy using Cobra iRadar!

Cobra iRadar App Dashboard

Displays speedometer, compass and car battery voltage.

Settings

Configure your Cobra iRadar settings.

Note: All radar/laser/red light camera detector settings will be inactive if you are not paired with Cobra iRadar or are out of range.

View Map

Shows user-marked locations, red light camera locations in your area and GPS-based speed & direction of travel.

Bluetooth Pairing Tips

If you are having trouble initializing or maintaining your **Bluetooth** connection take the following steps:

- 1) Turn off your Cobra iRadar detector device, wait 30 seconds, and then turn it back on.
- 2) If you are still not connected, go to your Android™ smartphone's **Bluetooth** settings menu, press and hold **iRadar 105** under **Bluetooth** devices to unpair it, press **Scan for devices** and select **iRadar 105**. Once the device is paired, re-enter the Cobra iRadar App.
- 3) If you are still having problems, completely shut off your smartphone and the iRadar detector unit, wait 30 seconds and turn them back on. Also, consult your Android™ Smartphone's user manual for **Bluetooth** troubleshooting tips.
